A quasi-contract refers to the obligation of the contract created out of order by the court not to let one party get unfair benefit out of the situation at the expense of other parties where there is the absence of initial agreement among the parties and there is a dispute between them. A quasi-contract is an agreement imposed by the law, which outlines the obligation of one party towards another party if the former possesses the property of the latter party, i.e., something is acquired by one party at the expense of another party. The court creates these to avoid unjust enrichment of any party’s overpayment against a good or service. Since the court makes these, neither party can disagree with it and must follow it. At the time of the delivery of the goods, the delivery man delivers them to the wrong address. Instead of denying the delivery, the receiving party accepts the order and consumes the same.The case went to the court, and the court then ordered to issue a quasi-contract according to which the recipient has to pay back the cost of the item to the party who paid for the item initially. So, in this case, the benefits of the goods have been enjoyed by the receiving party, so such a receiving party is bound to compensate the former party. Features The features are as follows: Usually, the quasi-contracts provide the right to the money.There is an absence of the contract or mutual consent among the parties; thus, it is imposed by the law and is not the outcome of any agreement.They are based on equity, a good conscience, justice, and principles of natural justice. Requirements of Quasi-Contract There are certain types of the requirement that are required for a judge to fulfill for making a ruling for the quasi-contract, as discussed below: – The plaintiff must have provided service or tangible goods to the defendant, and the plaintiff had the impression that he would receive payment for such goods or services.Also, the plaintiff should justify that the defendant would be unjustly enriched if he received goods or services without their payment. Types of Quasi-Contract The types are laid down under sections 68 to 72, which are mentioned below: – You are free to use this image on your website, templates, etc, Please provide us with an attribution linkArticle Link to be HyperlinkedFor eg:Source: Quasi-Contract (wallstreetmojo.com) #1 – Section 68 It states that a person is not capable of entering into any contract. Therefore, the supplies are provided to him or anyone the incapable person is legally bound to support by the third party. The supplier third party is entitled to recover such supplier’s price from the unable person’s property. #2 – Section 69 It states that if a person is interested in paying money and pays on behalf of another person, he is bound to pay by the law. So then, the person who made the payment is entitled to reimbursement by another party (on behalf of whom he has paid). #3 – Section 70 It states that the receiving party has enjoyed the same benefits if a person does anything for the other person lawfully or delivers something without intending to do the same gratuitously. Then, such a receiving party is bound to compensate the former party. #4 – Section 71 It states that if a person finds goods that belong to another party and takes such goods into his custody, then the former has responsibility the same as that of a bailee. #5 – Section 72 It states that if a person has been paid or delivered mistakenly or under coercion, he must repay or return. Difference Between Quasi-Contract and Contract The contracts are the expressed ones approved by the parties under consideration as a matter of law where they share interests and consequences though specifically described conditions. In contrast, under quasi-contracts, the obligations are enforced by the law based on the parties’ conduct to prevent the undue advantage of one party over the cost of another party. Advantages The advantages are as follows: It prevents the undue advantage of one party over the cost of other parties as it is based on the unjust enrichment principle.It is created by order of the court, so none of the parties involved can disagree with such orders. So, all the parties involved are obliged to follow it. Disadvantages The Disadvantages are as follows: The enriched party will not be held liable in the cases where the benefit he received was tendered negligently, unnecessarily, and by the miscount.It is generally created only to the extent necessary to prevent unjust enrichment. The plaintiff must forgo all the expected profit he would have earned if there is a whole expressed agreement between the parties involved. Conclusion There are situations when there is no contract between the parties. Still, even then, certain social relationships create specific obligations that some parties must perform by order of the court. These obligations are known as quasi-contracts since the same obligations are created as that would have been made in the case of the regular contract. These quasi-contracts are created based on justice, equity, and good conscience principles. Recommended Articles This article is a guide to Quasi-Contract and its meaning. Here, we discuss the advantages and disadvantages of types, features, and quasi-contract examples. You may learn more about financing from the following articles: – A quasi contract is a retroactive arrangement between two parties who have no previous obligations to one another. It is created by a judge to correct a circumstance in which one party acquires something at the expense of the other. The contract aims to prevent one party from unfairly benefiting from the situation at the other party's expense. These arrangements may be imposed when goods or services are accepted, though not requested, by a party. The acceptance then creates an expectation of payment. A quasi contract is a retroactive arrangement between two parties who have no previous obligations to one another. It is created by a judge to correct a circumstance in which one party acquires something at the expense of the other.The plaintiff must have furnished a tangible item or service to another party with the expectation or implication that payment would be given.The defendant must have accepted, or acknowledged receipt of, the item but made no effort or offer to pay for it. Quasi contracts outline the obligation of one party to another when the latter is in possession of the original party's property. These parties may not necessarily have had a prior agreement with one another. The agreement is imposed by law through a judge as a remedy when Person A owes something to Person B because they come into possession of Person A's property indirectly or by mistake. The contract becomes enforceable if Person B decides to keep the item in question without paying for it. Because the agreement is constructed in a court of law, it is legally enforceable, so neither party has to agree to it. The purpose of the quasi contract is to render a fair outcome in a situation where one party has an advantage over another. The defendant—the party who acquired the property—must pay restitution to the plaintiff who is the wronged party to cover the value of the item. A quasi contract is also known as an implied contract. It would be handed down ordering the defendant to pay restitution to the plaintiff. The restitution, known in Latin as quantum meruit, or the amount earned, is calculated according to the amount or extent to which the defendant was unjustly enriched. These contracts are also referred to as constructive contracts as they are created when there is no existing contract between the two parties involved. If there is an agreement already in place, though, a quasi contract generally cannot be enforced. A quasi contract is a court-imposed document designed to prevent one party from unfairly benefiting at another party's expense, even though no contract exists between them. A classic quasi contract circumstance may be created by the delivery of a pizza to the wrong address—that is, not to the person who paid for it. If the individual at the incorrect address fails to fess to the error and instead keeps the pizza, they could be seen as having accepted the food, and thus be obliged to pay for it. A court could then rule to issue a quasi contract that requires the pizza recipient to pay back the cost of the food to the party who purchased it or to the pizzeria if it subsequently delivered a second pie to the purchaser. The restitution mandated under the quasi contract aims for a fair resolution of the situation. Certain aspects must be in place for a judge to issue a quasi contract: One party, the plaintiff, must have furnished a tangible item or service to another party, or the defendant, with the expectation or implication that payment would be given. The defendant must have accepted—or acknowledged receipt of—the item of value, but made no effort or offer to pay for it. The plaintiff must then express why it is unjust for the defendant to receive the good or service without paying for it. In other words, the plaintiff must establish that the defendant received unjust enrichment. Considering the example above, the individual who ordered the pizza and paid for it would have every right to demand payment from the individual who actually received the pizza—the first individual being the plaintiff, the latter being the defendant. Under common-law jurisdictions, quasi contracts originated in the Middle Ages under a form of action known in Latin as indebitatus assumpsit, which translates to being indebted or to have undertaken a debt. This legal principle was the courts' way of making one party pay the other as if a contract or agreement already existed between them. So the defendant’s obligation to be bound by the contract is seen as implied by law. From its earliest uses, the quasi contract was typically imposed to enforce restitution obligations. Unjust enrichment is what happens when an individual benefits from a situation inappropriately, either because of luck or because of another person's bad fortune. A quasi contract is an after-the-fact contract between two parties who were otherwise not in a legal commitment to one another. This kind of contract is mandated by a judge seeking to address a situation where one party benefited from something at the expense of the other. The plaintiff has to have provided an item or service to either the defendant or another party with the expectation of getting paid. The defendant has to have accepted the item or service without attempting to pay for it. Finally, the plaintiff must establish that the defendant should not have received the item for free and that doing so constitutes "unjust enrichment." A quasi contract is also known as an "implied contract," in which a defendant is ordered to pay restitution to the plaintiff, or a constructive contract, meaning a contract that is put into existence when no such contract between the parties exists. An example might be if Person A offers to pay Person B to help them move to a new apartment, and agrees to pay the $100 for the help. The agreement is verbal and not a formal contract. Person B commits to the job, turns down a different job, and shows up on the required day to help with the move. But when Person B shows up, Person A tells them that they are not needed after all and that the job is canceled. Person B files a civil suit to have the missing money paid and a quasi contract might be instituted, if the judge agrees that money is owed. A quasi delict is when a wrong occurs accidentally, such as negligence, versus a true delict, which is when a wrong occurs deliberately. With a quasi contract, a defendant is required to behave as if there was a legal contract with the plaintiff. It is designed so that one party is not unjustly enriched at the expense of the other. Unjust enrichment is when someone benefits unfairly, either due to circumstance or the other party's misfortune. A quasi contract is rendered by a judge, as a settlement, after the fact, when a formal contract otherwise did not exist.
